

Jerome was so excited for his Spring Break! His family was going to take a trip to Florida to visit the beach, and he had so many things he was excited to do when he got there. In fact, he was so excited that he was having a difficult time paying attention during class on the Friday before Spring Break.

"Jerome? Are you listening?", Mrs. Rappa said, tapping Jerome on the shoulder.

"What?", Jerome jumped. He had been dreaming about playing in the warm, ocean water. He had no idea what Mrs. Rappa had been talking about.

"Jerome. You need to pay attention in class", Mrs. Rappa said, sternly. "This is the third time this week that I have noticed you daydreaming instead of working. I'm afraid I am going to have to let your parents know what has been going on."

Jerome panicked. If his parents knew that the trip was distracting him from getting his work done, they may cancel the trip. "No, Mrs. Rappa! Please don't tell my parents. I'll pay attention from now on. Please!"

Mrs. Rappa gave Jerome a serious look. "Alright. You have one more chance. If this happens again, I am calling them."

Jerome breathed a sigh of relief. He picked up his pencil and got right to work!

fly      tray      jeer

A butterfly's life cycle is amazing, because butterflies go through a process known as metamorphosis. Metamorphosis is when an animal's body changes its form in some way throughout its life cycle.

Butterflies start out as an egg. When the eggs hatch, a small caterpillar emerges. The larva spends its days eating and eating to get much bigger.

Eventually, the larva enters the pupa stage. This is when the caterpillar forms its chrysalis and metamorphosis will begin. The caterpillar's body will completely transform into a beautiful butterfly.

The final stage of the butterfly's life cycle is when it emerges from the chrysalis and is an adult butterfly. This butterfly will lay an egg, and the cycle will start over with a new larva.

free    tray    jaw

Josie was angry that her older brother had gotten into her room and taken some of her toys. She had tried to complain to her parents, but they both had told her that she needed to find a way to solve her problem.

Her brother Isaiah wasn't home, so she couldn't talk to him about it yet. But she was really angry with him for getting into her toys without asking.

As she was walking back to her room, she noticed a model plane that Isaiah had been working on for weeks, sitting on the table. Without thinking, she threw the plane on the ground and stomped on it. The plane cracked under her feet, and she stepped back to see what she had done. When she saw the broken plane on the ground, her heart sank.

Isaiah had made her angry by touching her toys, but he hadn't broken anything.

She rushed to pick up the pieces and tried to put the plane back together, but it was broken. Josie sat on the floor and cried because she felt so badly.

Suddenly, she heard footsteps behind her. "Josie, why are you crying?", Isaiah asked.

cinch \_\_\_\_\_

I heard my alarm go off, but I didn't want to wake up. Last night, during my team's play-off basketball game, we had lost. We were only down by two by the end of the game, and my teammate Nathan had passed me the ball right before the buzzer went off. I am the best three-point shooter on the team, and we would have won if I had made that shot. Instead, I missed and the other team re-bounded it. They ended up scoring another two points and won the game 84 to 80. My team was really disappointed to be out of the play-offs.

I heard my mom calling from downstairs, "Lucas! Get up! You'll be late for school!" I slowly got out of bed and started getting ready. He was hoping that if he took too long, he might miss the bus and get out of going to school for the day.

Who is telling the story above?
