

April 27, 2020

It was storming outside, and Melissa wanted to cry. Her birthday party was supposed to be outside at the neighborhood park, but the storms were so bad her parents were saying that they were going to have to have the party indoors instead. Melissa had been bragging to her friends all week that her party was going to be amazing. She was going to have a bounce house, and her parents had hired a magician to do magic tricks...some of them were even supposed to use fire! However, if the party had to be indoors, all of that stuff would be cancelled.

The storms didn't stop, so Melissa's parents called her friends' parents and let them know that the party had been moved to their house. They cancelled the magician and the bounce house. All that was left was cake, the balloons, and Melissa. She just knew that this would be the most boring party ever, and her friends would make fun of her after it was over!

As the guests began arriving, a huge bolt of lightning struck nearby, and the power went out in the entire neighborhood! Melissa began to panic. Now the party was really ruined! Her dad stumbled around, lighting candles and pulling flashlights out of drawers and cabinets.

"Look at all those flashlights!", Melissa's friend Sasha exclaimed. "Let's play flashlight tag!"

The girls spent most of the party laughing and hiding from each other in the dark. They ate cake by candlelight, and used flashlights to help Melissa see all of her presents. It ended up being one of the most fun parties any of them had ever been to.

CHARACTER

PROBLEM

SOLUTION

SETTING

Combine and rewrite the two sentences.

Max likes basketball. Max likes baseball.

Complete the patterns below.

551, 561, 571, ----,
----, ---

----, 297, 287, ----,
267, ---

Circle all of the odd numbers.

71 17 9
42 24 63
0 17
38 10 99 4 26

Draw the number below and write it in word form.

751

Write proper nouns for each of the common nouns below.

city _____

school _____

country _____

Draw lines to match the words with the same root words.

hopeful

joyful

joyous

hoping

drawing

quicker

quickly

draws

Rewrite the sentence, with all mistakes corrected.

hav you ever been to australia!

Write the past tense of each verb below.

walk _____

grab _____

jump _____

hop _____

run _____

Marcus wasn't looking forward to going home today. He was grounded for staying up too late playing video games last night, even when his parents told him to go to bed several times. He couldn't help himself! He was so close to beating a huge record. No one at school had ever beat the level he was on, and he couldn't stop playing until he knew that he was going to win! But his parents didn't care about the big record. They were upset that he didn't listen to their directions, and now he had lost video game for the rest of the month.

He had been grounded one other time before. His parents had taken away all of his electronics then, too. To give him something different to do, they gave him a list of chores around the house to do. He was pretty sure his parents were going to do this same thing this time, which is why he was not looking forward to going home.

When his bus dropped him off in front of his house, he walked as slowly as he could up his driveway. Sure enough, taped to his front door was a note that read:

"Welcome home, Marcus. Please do your homework, sweep and mop the kitchen floor, take both dogs for walks, and set the table for dinner. We will have more for you to do after we have had dinner."

Marcus groaned and ripped the note off of the door. It was going to be a long week.

A plant's life cycle is such an interesting process to learn about! The seed is the very beginning of the plant's life. Inside the seed is everything that plant will become. It just needs enough sunlight and water to grow. When the plant breaks out of the seed, it heads deep into the soil to find the best nutrients. Once it is rooted in the soil, it will grow upwards towards the top of the soil. The nutrients in the soil help to feed the plant until it is mature enough to reach the top of the ground and get sunlight!

When the plant is old enough, it will grow seeds of it's own. These seeds get spread around when insects pollinate them or when the wind blows them around. This helps the seeds plant in the ground in new places. The cycle starts over, and new plants are born!

Ms. Jones announced to the class that the local museum was holding an art competition. The five best paintings would be featured in the art museum for a month, and the first place winner would receive fifty dollars!

"I have to win", Supriya thought to herself. She instantly knew who her competition would be. Garrett, in Mrs. Jackson's class, was a great artist, and sometimes their art teacher thought his drawings were better than hers.

When she got home that afternoon, Supriya locked herself in her room and painted picture after picture, trying to make the perfect painting that could beat Garrett. She stayed up late. She woke up early. She tried her hardest on each picture, but she wasn't sure if any of them were good enough.

When the day of the contest arrived, Supriya went to the museum and was shocked to see neither hers nor Garrett's paintings with first place ribbons. Maya, a quiet girl in Supriya's class had entered, and she had won! Supriya realized that she had been so focused on beating one person, she didn't notice how talented other people around her were!

circle $\underline{\quad}$

cost $\underline{\quad}$

Subtracting Three-Digit Numbers

When you subtract 3-digit numbers, first subtract the ones place, then the tens place, and finally the hundreds place. Sometimes you will need to borrow from a column with a larger place value to subtract.

EXAMPLE: Subtract: 862
 -413

STEP 1: Subtract the ones column. $2 - 3 = ?$ You cannot subtract $2 - 3$ without borrowing from the tens column. Borrow 1 ten by crossing off the 6 and making it a 5. Add the borrowed 10 to the ones column. $10 + 2 = 12$. Now you can subtract $12 - 3 = 9$

$8\cancel{6}2$
 -413
 \hline
 9

STEP 2: Subtract the tens column. Don't forget the 6 is now a 5.
 $5 - 1 = 4$

$8\cancel{6}2$
 -413
 \hline
 49

STEP 3: Subtract the hundreds column. $8 - 4 = 4$

$8\cancel{6}2$
 -413
 \hline
 449

ANSWER: 449

Subtract.

1.
$$\begin{array}{r} 716 \\ - 545 \\ \hline \end{array}$$
2.
$$\begin{array}{r} 482 \\ - 263 \\ \hline \end{array}$$
3.
$$\begin{array}{r} 377 \\ - 119 \\ \hline \end{array}$$
4.
$$\begin{array}{r} 295 \\ - 183 \\ \hline \end{array}$$
5.
$$\begin{array}{r} 647 \\ - 532 \\ \hline \end{array}$$
6.
$$\begin{array}{r} 927 \\ - 708 \\ \hline \end{array}$$
7.
$$\begin{array}{r} 849 \\ - 158 \\ \hline \end{array}$$
8.
$$\begin{array}{r} 343 \\ - 134 \\ \hline \end{array}$$
9.
$$\begin{array}{r} 797 \\ - 453 \\ \hline \end{array}$$
10.
$$\begin{array}{r} 555 \\ - 111 \\ \hline \end{array}$$
11.
$$\begin{array}{r} 462 \\ - 233 \\ \hline \end{array}$$
12.
$$\begin{array}{r} 219 \\ - 108 \\ \hline \end{array}$$
13.
$$\begin{array}{r} 834 \\ - 617 \\ \hline \end{array}$$
14.
$$\begin{array}{r} 921 \\ - 702 \\ \hline \end{array}$$
15.
$$\begin{array}{r} 638 \\ - 119 \\ \hline \end{array}$$
16.
$$\begin{array}{r} 754 \\ - 235 \\ \hline \end{array}$$
17.
$$\begin{array}{r} 513 \\ - 409 \\ \hline \end{array}$$
18.
$$\begin{array}{r} 655 \\ - 424 \\ \hline \end{array}$$
19.
$$\begin{array}{r} 424 \\ - 215 \\ \hline \end{array}$$
20.
$$\begin{array}{r} 394 \\ - 182 \\ \hline \end{array}$$

Subtract 10 or 100 From Numbers

When you **subtract by ten**, you only need to subtract 1 from the tens column. When you **subtract by one hundred**, you only need to subtract 1 from the hundreds column. You can do this in your head.

EXAMPLE: Subtract: $224 - 10$.

STEP 1: Look at the larger number 224. Find the number in the tens column. It is 2.

STEP 2: Subtract 1 from the tens column: $2 - 1 = 1$

ANSWER: 214

EXAMPLE: Subtract: $847 - 100$.

STEP 1: Look at the larger number 847. Find the number in the hundreds column. It is 8.

STEP 2: Subtract 1 from the hundreds column: $8 - 1 = 7$

ANSWER: 747

Subtract 10 from each of the numbers.

1. 48

3. 254

5. 941

7. 834

2. 367

4. 117

6. 625

8. 520

Subtract 100 from each of the following numbers.

9. 725

11. 185

13. 500

15. 351

10. 634

12. 912

14. 101

16. 436

Subtraction Word Problems

Read the problem. Write the answer.

1. Brian had 14 dollars. He gave 1 dollar to his brother. He spent 3 dollars on a toy. How many dollars does Brian have now? _____

2. There are 947 flowers in Mrs. Blackwell's garden. She gives 112 of the flowers to her sister as a birthday present. How many flowers does Mrs. Blackwell have left in her garden? _____

3. A chicken farmer has 218 laying hens. On Monday, the hens gave the farmer 187 eggs. Each of the hens that laid eggs on Monday only laid one egg each. How many hens did not lay any eggs at all? _____

4. Mr. Davis gives his 2nd grade class a holiday party. He brings 48 donuts to the party. The children in his class eat 32 of the donuts. How many donuts are left over? _____

5. There are 753 students at Allgood Elementary School this year. Next year, there will be 62 less students at the school. How many students will attend Allgood Elementary School next year? _____

6. A clothing store has 735 shirts at the start of the big sale. At the end of the first sale day, they have 417 shirts. How many shirts did the clothing store sell the first day of the sale? _____

7. The school lunchroom made 400 hamburger lunches for Tuesday. They sold 368 of the hamburger lunches. How many hamburger lunches were left over? _____

8. There are a total of 582 fish at the Happy Pet Store. The store sells 118 of the fish on Saturday. How many fish are left at the Happy Pet Store? _____

9. Melissa is reading a book with 94 pages in it. So far, she has read 36 of the pages. How many pages does Melissa have left to read? _____
